

Silverwood Park

Project Scope

Silverwood Park is part of the Three Rivers Park District and is a one-of-a-kind park in the Minneapolis metro area.

Miller Dunwiddie, in conjunction with Concrete Treatments designed and implemented a polished concrete floor for Silverwood Park.

From the design of the ready mix through the completion of the project, we worked with Three Rivers Park District to achieve the floor they were looking for. With a river rock embedded design along with the multiple colors and stenciling, the floor is not only an easy to maintain surface, it is a work of art.

- CTI 1500 Polished Concrete
- Over 15,000 sq ft finished
- Project design & application
- Custom coloring & stenciling
