

Cabela's Outfitters

Project Scope

The worlds foremost outfitter for hunting, fishing and camping gear had been using polished concrete floors but were unhappy with them.

Concrete Treatments got involved, listened to their concerns and problems and came up with a polished floor that met their expectations. We implemented it at their Hammond, Indiana store and their Rapid City, SD store. We continue to work with them through their maintenance staff to keep the floors looking like the day we left.

- CTI 800 grit polish
- Over 40,000 sq ft completed
- Project design
- Application & coloring
